Art Unit: 1641

1) In view of the supplemental amendment filed October 16, 2003 (certificate of mailing date of October 14, 2003) which crossed in the mail with the final Office action mailed October 15, 2003, the final rejection of October 15, 2003 is hereby withdrawn in favor of the rejections set forth below.

2) All of the rejections made in the final Office action mailed October 15, 2003 are reinstated and maintained for the reasons of record.

3) The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4) Claims 13 and 25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention (i.e. as containing new matter). The change made to the sequence ID in claim 13 constitutes new matter. Although applicants state that the change constitutes a correction of a typographical error, this statement has not been substantiated. In view of the fact that the designation "W" is the conventional designation for the amino acid tryptophan and "V" is the conventional designation for the amino acid valine, the change of "W" to "VV" constitutes a change in the structure of the sequence to substitute two valines for tryptophan. Applicants must provide evidence to establish that this change is, in fact, typographical rather than substantive in nature (see the sequence of page 2, line 20 of the specification).

5) Applicants' amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
